1. The drawings are objected to because box R1 in figures 2, 4, 5, 5, 7, 8, and 9 is not shown or labeled as to its use or purpose, such being labeled "LOAD". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the saturable reactor and the transformer being replaced with a saturable transformer as recited by claims 5 and 9 must be shown or the features canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

4. Claims 1-9 are objected to because of the following informalities.

Claims 1-9 are vague and indefinite since in lines 12, 14, and 15 of independent claim 1 and lines 16, 18, and 19 of independent claim 6 the phrases "can" and "can be" merely set forth the possibility that something might happen instead of positively asserting that something has in fact occurred.

Claims 1-9 are vague and indefinite since in line 16 of independent claim 1 and line 20 of independent claim 6 "said open switch" lacks proper antecedent basis.

Claims 5 and 9 are incorrect and improper since a previously recited claim element can not be eliminated or replaced.

Appropriate correction is required.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Onda et al (US 4,858,096).

Onda et al discloses a switching power conversion circuit comprising a transformer (T) having a first primary coil (n11), a second primary coil (n12), and a secondary coil (n21 and n22) connected to a load through output terminal (OUT); a saturable reactor (Lm1 or Lm2) connected to the secondary coil, a first switch (M1) forming a first switching assembly with the first primary coil; and a second switch (M2) forming a second switching assembly with the second primary coil wherein the two switching assemblies are connected in parallel across a series connection of a first potential (E) a reactor (L1).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

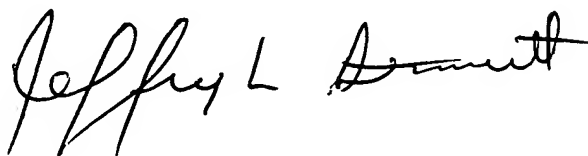

Miko (US 4,334,267), Harada et al (US 4,553,199), Voight et al (US 4,603,307), and Vinciarelli et al (US 5,668,466) are cited to show switching power conversion circuits old and known in the art at the time of the invention.
